Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7 and all claims dependent therefrom recite limitations comprising only logic. Since "logic" does not comprise any physical element, the use of the terminology, "A system" appears to be misdescriptive.

Claim Rejections - 35 USC §101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-18, as best understood, are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to

promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, the recited steps/logic/program of navigating a user use the Internet to advance the technological arts.

Additionally, for a claimed invention to be statutory, the claimed invention must produce a useful, concrete, and tangible result. In the present case, claims 1-18 do not appear to produce a tangible result. Therefore, because the recited process/system/program does not produce a useful, concrete, and tangible result, claims 1-18 are deemed to be directed to non-statutory subject matter.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shavit et al.

Shavit et al. disclose, or inherently teach, all of the limitations of the claims including: registering a plurality of stores, distributors, and suppliers (see for example, Col. 6, lines 9-13) utilizing a network; use of identifiers (see for example, Col. 10, lines 1-15); receiving requests from users for access to a database (see for example, Col. 9,

lines 43-56); displaying particular information depending on the identity of the user (see for example, Col. 9, lines 43-56); but lacks the specific teaching using the Internet to display specific web pages.

It would have been an obvious design choice at the time of the invention to one of ordinary skill in the art to use the Internet to display different web-pages for different users as is well known in the art of Internet commerce.

Relevant Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The assignee, Restaurant Services Inc. (RSI), launched a product (RSI/Link) "to collect sales, shipment, pricing, and inventory information from Burger King's 350 suppliers and distributors" (See "A Whopping Inventory Task") in 1994.

The article "Burger King Orders AT&T Mail Service" discusses how "the E-mail network will replace a manual, paper-based tracking and ordering system."

The Examiner requests that the applicant provide the Office with any known information relevant to the above mentioned product launch.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to F. Ryan Zeender whose telephone number is (703) 308-8351. The examiner can normally be reached on Monday-Friday, 8am-5pm.
